Our Connecticut dairy farm manufactures the only 100% biodegradable pots made from cow manure.

### **What makes CowPots the most sustainable choice?**

- 100% Plastic and Peat Free
- Zero waste stream manufacturing
- Made using solar energy & methane gas
- No pot to throw away, reducing landfill waste
- Made from a renewable and recycled byproduct:  
**cow manure**

### **What makes CowPots the best choice for growing?**

- Plant the whole pot!
- Never remove your plant from a pot again
- Unrestricted root penetration, never root bound
- No cutting or tearing, reduces transplant shock
- 80% degraded within just 3 months underground

"I'm amazed how perfect this pot is for going into the field. The root mass it creates is so fibrous, no pot offers better air pruning. These are tremendous when you don't want transplant shock."

Rich Morris, Toadflax Nursery, NY
